

TOOLS STORAGE

STANLEY
®

A photograph of two construction workers in hard hats and high-visibility vests examining a large, open toolbox on a construction site. One worker is kneeling on the left, looking into the toolbox, while the other is kneeling on the right, pointing at the interior. The toolbox is black with yellow accents and contains various tools and components. In the background, a large metal structure and a clear blue sky are visible.

“A lot of pro's told us that they have to spend time reorganising their toolbox depending on what job they're doing on site on any given day. Partly because their current toolbox doesn't use space effectively.

Our answer was to create an organiser with interchangeable totes. At the push of a button you can switch between a unique 60cm power tools tote and a 60cm organiser, both with removable dividers.”

STORAGE BAGS, TOOL BELTS & PUCHES, TOOLBOXES

The toughest, weather resistant toolboxes in a variety of shapes and sizes to suit all requirements. All are dropped repeatedly with increasingly heavier loads to establish the maximum resistance and the highest safe carrying weight. All handles and latches are severely tested for strength and durability to ensure that they will endure long and repeated usage.

FatMax® XTREME™ ROUND TOP TOOL BAG

**FatMax®
XTREME™**

- The most heavy duty 1200 denier fabric for long lasting durability
- Magnetic quick close operation of the "2 position" pockets allows tools to be secured while transporting and easily accessible when working
